## PROJECTS

### To-Do App Plugin for WordPress

Developed a WordPress plugin to manage a simple To-Do list using custom database tables and AJAX functionality. The plugin allows users to add and delete tasks, with real-time updates via AJAX, ensuring a seamless user experience without page reloads. Built using PHP, MySQL, WordPress hooks, and JavaScript.

### Custom WordPress Portfolio Website

Developed a custom WordPress theme to showcase my skills, projects, and achievements. Integrated a sidebar navigation, About Me section, and links to my coding profiles (GitHub, HackerRank). Fully responsive

### E-commerce Website - ADAA Jaipur

[🔗 Live Demo](#)

Collaborated with a team to develop a full-stack e-commerce platform using React.js, Tailwind CSS, Node.js, and Express.js.

Integrated Gemini AI-powered chatbot for customer support.

Contributed to the admin panel, search functionality, and user authentication.

Used Nodemailer for order confirmation emails.

### Wedding Planner Website

Developed a wedding planner website utilizing React for the frontend, Express.js and Node.js for the backend, and MongoDB for data storage. Integrated a live chat feature using Socket.io to enhance real-time communication between users and admin

### Inventory management system

Developed a desktop application for inventory management using Java, Java Swing, Hibernate, SQL, and JDBC.

### Marvel Universe Info Hub

Developed a Marvel info website utilizing HTML, CSS, Bootstrap, and JavaScript. The website offers detailed information about Marvel comics and characters with a responsive design
